Election/Restriction

1. Applicant's election of Invention of Group I, Claims 1-8, 11-12, 15-16, 19-20, and 23-31, in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Applicant's election without traverse of Invention of Group I Claims 1-8, 11-12, 15-16, 19-20, and 23-31, in Paper No. 7 is acknowledged. However Claims 1-8, 11-12, 15-16, 19-20, and 23-31 are containing claims directed to the following patentably distinct species of the claimed invention:

Embodiment 1, wherein an inorganic layer on a substrate which comprises a pattern of metal lines on the substrate and an inorganic dielectric on the substrate between the metal lines, and an organic layer on the inorganic layer which comprises an organic dielectric having metal filled vias therethrough which connect to the metal lines of the inorganic layer.

Embodiment 2, wherein an organic layer on a substrate which comprises a pattern of metal lines on the substrate and an organic dielectric on the substrate between the metal lines, and an inorganic layer on the organic layer which comprises an inorganic dielectric having metal filled vias therethrough which connect to the metal lines of the organic layer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2811

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

3. Papers related to this application may be submitted to Technology center (TC) 2800 by facsimile transmission. Papers should be faxed to TC 2800 via the TC 2800 Fax center located in Crystal Plaza 4, room 4-C23. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Group 2811 Fax Center number is (703) 308-7722 and 308-7724. The Group 2811 Fax Center is to be used only for papers related to Group 2811 applications.
